WORK EXPERIENCE

UniVista / Chief Technology Officer 2024 – September 2025

Expanded system capabilities and service offerings while reducing barriers and manual overhead. Managed internal technology budget. Oversaw R&D for new internal systems, customer infrastructure, and resale products. Created new policies including on security, incident response, disaster recovery, and AI.

- Transitioned legacy EDR A/V to MDR with SOC offering
- Onboarded 365 Copilot, OpenAI / ChatGPT, and evaluated AI tools
- Automated internal systems deployment & onboarding

UniVista / Operations Manager 2020 – 2024

Directed service operations and aligned staff to maximize the client experience. Audited and ensured adherence to organizational and regulatory compliance requirements (CJIS, PCI, NIST). Adopted and ensured adherence to KPIs. Assigned training, improvement plans, and disciplinary measures. Acted as technical escalation point in the company.

- Adopted electronic quoting and procurement systems
- Developed pandemic-era remote-work offerings
- Established proactive internal systems role (Centralized Services)
- Established proactive client technician role (Standards Alignment)

UniVista / Technical Team Lead January 2016 – 2020

Led the technical teams in meeting SLA and providing consistent service delivery. Acted as primary escalation point in the company. Administered internal systems and developed improvements to systems and processes.

- Rebuilt RMM and developed scripts
- Met proactive maintenance SLAs via automation
- Modernized internal systems, adopted hybrid cloud

Mad City Techs (Systems Administrator / 2014 – 2015)

Gadgets (Service Technician / 2011 – 2013)

Weldon Computers (Service Technician / 2008 – 2010)

OVERVIEW

I'm a highly motivated computer systems expert who has spent my career focused on helping people to achieve their goals with technology. For over a decade I've been responsible for every stage of technology service delivery and take pride in ensuring the production of optimal outcomes for stakeholders, team resources, and end-users alike. I'm looking for an opportunity that will allow me to have a measurable positive impact in an environment that enables passionate and motivated team members.
